QUALITY FOR LIFE

EP HENRY®

We never could've anticipated how much our patio would enhance our lives. Our family can all be together, relaxing and enjoying the outdoors.

As the owner of a family business, I take great pride in the impact that our products have on people's lives. Our mission is to bring friends and families together through amazing outdoor living spaces. Every year we seek to push the limits of what's possible to help people like you achieve that dream, and this year we've pushed harder than ever.

I'm excited to announce the addition of ColorTech™ to our most popular products. If you turn the page you'll see more details on why we're so thrilled about this industry-leading innovation, which enhances color and provides unprecedented protection for your investment. In addition, we've built on the success of our exclusive Cast Stone Walls with a new Cast Stone Collection. Our new Belmont Pavers and Cast Stone Caps replicate the beautiful colors and textures found in natural stone to create the perfect pairing for our Cast Stone Walls.

As you page through this catalog, you'll find more information about these products and the full line of EP Henry products. I'm especially proud of our newest offerings this year and hope that you'll be just as proud to add them to your home.

From my family to yours,

J.C. Henry III

SYMBOL KEY

ECO PERMEABLE PAVERS

With our eco-friendly paving solutions, you can be sustainable and have a beautiful project.

DO NOT USE FOR VEHICULAR APPLICATIONS

It is not recommended to use these pavers for residential driveways.

DO NOT USE COMPACTOR

Do not use a plate compactor on Cast Stone or Lastra products.

DON'T SCUFF THE PAVERS

EP Henry recommends the use of a protective pad between the plate compactor and the paving stones to prevent surface damage during installation. EP Henry will not be held responsible for compaction scuffs or burns on pavers.

COLOR DISCLAIMER

Photographic reproduction, print and online screen resolutions do not always present color precisely. For these reasons and to ensure your complete satisfaction with your EP Henry product, we recommend that you visit your local EP Henry Authorized Hardscaping Distributor® or ask your contractor for samples before making a final decision.

EP HENRY – A HISTORY OF INNOVATION

Important information to use in your decision-making process

What's in a Name?

There are two distinct manufacturing methods for producing pavers: face-mix and through-body. To face-mix or through-body – that is the question.

For 30 years, EP Henry pavers have been produced using the face-mix method. One of the first to do this in the US and the first in the Mid-Atlantic states, we coined the term Duraface® to brand our process. This two-step manufacturing process concentrates an enriched layer of cement, pigment and very hard, small aggregate on the top layer of the paver, which we refer to as the wear surface. In contrast to a through-body paver, our Duraface® paver is richer in color and has a smoother, more durable wear surface. In our 30-year history of Duraface®, we have never had a paver where the face-mix layer has worn through and our lifetime warranty backs it up.

What's the difference?

EP Henry Duraface®

Cambridge with ArmorTec®*

Don't be Fooled by a Name

Face-mix pavers require more complex manufacturing equipment and a higher level of production sophistication. As a result of our industry-leading success, other manufacturers have migrated from producing a through-body paver to a face-mix.

> The face-mix manufacturing process is more sophisticated and results in a more durable paver that doesn't show large stone on the surface.

As they say, "imitation is the greatest form of flattery." Most manufacturers who now produce a face-mix paver created their own branded name for it. While the name itself is touted as "exclusive," the production method is not. So when you hear a claim that they are the only one with "ArmorTec®" or "Paver-shield," what they are telling you is that they're the only manufacturer with that name for the face-mix process, not the only manufacturer using it.

Blending Capabilities

Five years ago we raised the bar in the industry by investing in the most sophisticated system in the world to produce blended pavers. The Colorist system uses proprietary German technology to produce up to 6-color blends with pinpoint accuracy. Prior to the Colorist system, the batching of colors was managed by the individual paver machine operator and was as much an art form as a science, and prone to variation. In the field, the contractor would then have to take extra care to create the proper dispersion of colors. Colorist is unequalled in its sophisticated blends and consistent blending capabilities.

> The Colorist system takes the guesswork out of blending color because the "color recipe" is programmed into the computer that runs the equipment and provides a consistent blend of color within every paver.

ArmorTec® is a registered trademark of Cambridge Pavers, Inc. All references throughout this catalog to Cambridge with ArmorTec are to paving stone products manufactured by Cambridge Pavers, Inc. EP Henry Corporation and Cambridge Pavers, Inc. are competitors and, therefore, EP Henry Corporation is not affiliated or associated in any way with Cambridge Pavers, Inc.

Colorist Comparision

Without Colorist

With Colorist

Advancements in Paver Sealing

Traditional topical sealers were developed to make pavers more resistant to staining. Many homeowners opt to seal their pavers because it makes them easier to care for. Outdoor kitchens, driveways, and heavily wooded areas (where leaf stains are an issue) are good candidates for adding a sealer. Applied after installation, a topical sealing process involves applying a coating to the top layer of the pavers. Sealing properly can be challenging, as the application is dependent on favorable weather conditions and skilled technicians. It may take several days or more to complete, and it carries a considerable price tag - several dollars per square foot. A typical sealer may offer protection for 1-3 years.

Bristol Stone with ColorTech Sedona

ColorTech™ by EP Henry

ColorTech™ by EP Henry is the newest advancement in paver treatment. An integral sealer, as opposed to a topical treatment, ColorTech costs substantially less and lasts much longer than a topical sealer application. ColorTech is factory-applied and is cured into the concrete, providing the pavers with an enriched depth of color while protecting them for a lifetime of use.

> ColorTech™ protects your paver investment by resisting stains, acid rain and UV rays.

It's shown to reduce primary efflorescence and is more resistant to de-icing salts than pavers without ColorTech. ColorTech now comes as a standard feature in our best-selling Premiere Collection of Bristol Stone and Chiseled Stone pavers as well as in our new Cast Stone Paving and Wall Caps use. See the ColorTech difference for yourself!

Innovation Continued on page 40 ➔

SOLIDIA: A BETTER CEMENT FOR A BETTER PLANET

Our reputation as the leader in the industry has led to some significant partnerships in new product and technology development. Our most recent – and perhaps most exciting – partnership is with Solidia Technologies, a next generation cement backed by a number of the most prominent and respected venture capital firms. Solidia selected EP Henry as its partner to introduce hardscaping products to the marketplace based upon our proven track record. Solidia offers many benefits compared to traditional cement-based products, including enhanced color vibrancy, near-elimination of primary efflorescence, and much greater resistance to de-icing salts. Perhaps most important is Solidia's unparalleled sustainability profile. **By reducing the carbon footprint of concrete by up to 70%**, Solidia Cement goes a long way to meeting the cement industry goal of reducing its carbon emissions by 20% by 2020. Solidia is simply "a better cement for a better planet."

In 2019 we will offer a select number of our products with Solidia Cement, including our ECO™ Bristol Stone® on p. 66.

Tucson ECO Bristol Stone with Solidia, Random Installation

> "As the trusted leader in concrete, renowned for driving both market and product innovation, EP Henry was our first choice as the global launch partner for Solidia Cement. With their unmatched market knowledge and deep expertise in product and service innovation, they have helped us make a better concrete that is not only good for customers, but for the planet at large. We are so grateful that EP Henry has helped us make sustainability smart business for cement and concrete."
>
> – Tom Schuler, President and CEO, Solidia Technologies

Double Sided Cast Stone Wall Aspen

The Cast Stone Wall Collection:

Unrivaled Beauty to Complement your Paver Selection

EP Henry Cast Stone Wall is the best-selling premium wall system in the industry. Closely replicating the look of natural stone, it has been specially designed to pair with our Premiere Paver Collection. Cast Stone Wall is the marriage of two technologies patented by, and exclusively available from, EP Henry. Explore the limitless design possibilities and add dimension to any outdoor living space with the premium look of natural stone.

See the range of sizes, styles and colors on p. 75-82.

Seeing is Believing

EP Henry is more than a manufacturer – we are a visionary technology company with a broad patent portfolio, including six for Cast Stone Wall alone. When considering what product to use for your project, be sure to compare actual product samples – we're confident you'll choose EP Henry.

EP HENRY®

COLORTECH™ NEXT-LEVEL DURABILITY

Resists staining

Reduces fading from UV rays

Improves protection from acid rain

Enhanced Color. Advanced Protection.™

EP Henry's exclusive ColorTech™ process creates a look that's a cut above natural stone. ColorTech™ is a factory applied integral sealer that unlocks the natural beauty of pavers while adding a layer of protection that's resistant to most common stains, erosion from acid rain, and fading from UV rays. The result is long-lasting color that enhances the appearance of your backyard today and protects your investment for tomorrow.

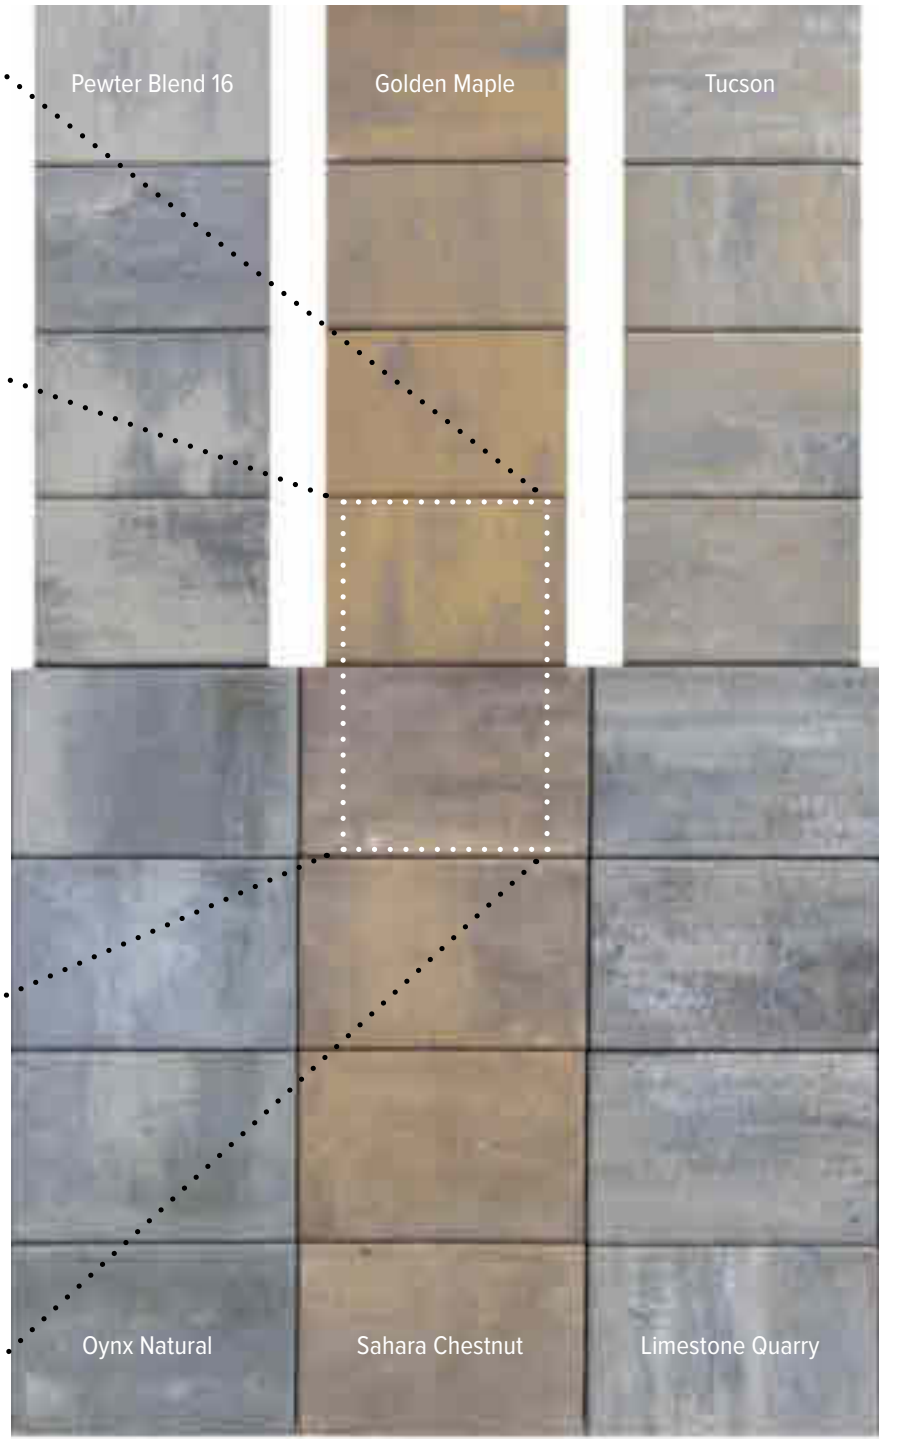
COLORTECH™ - YOU BE THE JUDGE

EP Henry ColorTech



Cambridge with ArmorTec®

If you're looking for exceptional colors that last, you're looking for ColorTech.

ColorTech uses the latest advancements in paver technology to deliver rich colors that mimic shades found in natural stone with more consistency and better cohesion. This proprietary, in-line sealing technology delivers an added layer of protection while enhancing the durability of the stone.

Only EP Henry Provides: **Durafacing + Colorist + ColorTech**

EP HENRY®

THE EP HENRY PAVER ADVANTAGE

EP Henry Duraface® + Colorist + ColorTech™

Cambridge with ArmorTec®

Techo-Bloc®* through-body

Sure, you can buy a paver from another manufacturer. But what it won't come with is the superior blending that our Colorist System provides. Nor will it come with ColorTech, our in-line factory-applied sealer that enhances the color and protects for a lifetime of use.

Techo-Bloc® is a registered trademark of Techo-Bloc, Inc. All references throughout this catalog to Techo-Bloc are to paving stone products manufactured by Techo-Bloc, Inc. CAST STONE WALL

Walls are a wonderful way to add beauty and dimension to any outdoor living space. EP Henry's patented Cast Stone Wall Collection truly replicates the beauty of natural stone. While it has a premium look, our Cast Stone Walls are typically much more affordable than natural stone walls. If you're looking to add the look of natural stone to your property, no other wall product on the market comes closer.

Terrace Wall Harvest Blend

Are you fighting an uphill battle?

EP Henry's line of retaining walls, including our popular Terrace Wall, will help you re-imagine life at home. With the help of their contractor, these homeowners reclaimed over 1000 square feet of unused sloping land to create the backyard oasis of their dreams.

CAST VENEER STONE

Cast Veneer Stone Ledgestone Birch, Dry Stack; Bristol Stone I and II Avalon Blend

CAST VENEER STONE OPTIONS

NEW

SPEC MIX® Polymer Modified Adhered Veneer Masonry Mortar

SPEC MIX PMAVM is a technologically advanced adhered veneer mortar for use in bonding manufactured stone veneer, natural thin cut stone and thin brick to a cementitious substrate. PMAVM is designed to provide excellent workability and cohesion, high bond strength and durability, sag and water resistance and efflorescence minimization.

SPEC MIX PMAVM has been rigorously tested to reduce the probability of unit "pop-offs" and contractor call-backs to repair adhered veneer failures common with standard mortars.

EP Henry recommends installation methods and guidelines from the Masonry Veneer Manufacturers Association.

Magnum Isokern Fireplace; Cast Stone Wall Face Shells Breckenridge

Standard Isokern Fireplace with Cast Stone Wall Face Shells Aspen

EARTHCORE ISOKERN MODULAR FIREPLACES

For over 25 years, Earthcore's Isokern Systems have been the leader in safe, lightweight, easy to install fireplace systems and are backed by a Lifetime Warranty against manufacturer defects.

The Standard series comes in 36", 42" and 46" openings.
The Magnum series comes in 36", 42" and 48" openings.

Please visit the products section of our website for more information on Isokern Fireplaces.

Outdoor Kitchen Collection

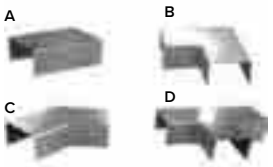
Cast Veneer Stone Cut Stone Breckenridge, Mortared

ISOPANEL MODULAR KITCHENS

Isokern has streamlined the construction of building the classic culinary outdoor kitchen for quick assembly. Using our Isokern Panels and Clips, building a beautiful, durable and practical outdoor kitchen is easier than ever. The IsoPanels will also support the Iso'ven for added options to construction.

ISOKERN PANELS

- **Dimensions per panel:** 24"w x 34"h x 3"d
- Each panel weighs only 100 lbs, so they're easily moved when assembling your new outdoor kitchen components.



CLIPS

- **Use:** Slide the appropriate clip over the junction of 2 adjacent panels for holding them together while the mortar is applied.
- **Options: A.** Straight **B.** 90° **C.** 45° **D.** T clip.

ISO'VEN WOOD BURNING PIZZA OVENS

Iso' ven with Cast Veneer Stone Ledgestone Silverton

Iso' ven with Cast Veneer Stone Ledgestone Silverton

ISO'VEN & EP HENRY'S CAST VENEER STONE

There's nothing better than a real wood burning oven. Introducing the Earthcore Iso'ven Wood Burning Oven, the user-friendly, remarkably affordable outdoor wood burning pizza oven made from our exclusive volcanic material. Created for easy installation, the quick-fire Iso'ven heats up to 800 degrees in an hour. The Iso'ven Wood Burning Pizza Oven comes with everything you need to get started. Perfect for 12" pizza, bread, wings and more. Includes: Proprietary Oven Liner, Refractory Mortar, Cooking Surface, Thermometer and Starter Fire Kit.

All Isokern fireplaces, pizza ovens and modular kitchen kits can be made "personally" yours by customizing it with EP Henry's beautiful Cast Veneer Stone or Cast Stone Wall Face Shells, the closest match to real stone, at a fraction of the cost.

TABLETOP OVEN WITH OPTIONAL STORAGE SPACE

Fires strengthen the bonds between friends and family. Recognizing this, Earthcore developed the ideal companion for your Iso'ven Wood Burning Pizza Oven — our Table Top Oven with Optional Storage Base. Adding a new dimension to backyard dining, it allows you to choose the height of your Iso'ven in relation to the rest of your outdoor kitchen or living space.

OPTIONAL STORAGE:

Ample room for wood, pizza peels, aprons, cooking tools and more.

OPTIONAL HOOD:

Following the classic approach of traditional wood burning ovens, the Iso'ven is designed to vent through the front. But at Earthcore, we believe customization creates satisfaction. So if you prefer a flue, we now offer a hood for Iso'ven designs, giving you the freedom to finish it in your own personal style.

CREATE THE PERFECT OUTDOOR KITCHEN

PRE-MEASURED-CUT-PACKAGED-KITS

The Kitchen is a series of individual cabinet kits that come complete with everything you need to build, including precut block and granite tops sized to fit, reinforcements, and more! Depending on the complexity, most kitchens can be built in a day or less. Build your kitchen all at once or add new features over time. Because of their modularity, expanding your outdoor cooking and entertaining space is easy to do at any time.

ACCESSORIES

EP Henry offers a complete line of cleaning and sealing products from TechniSeal® to maintain the beauty of your pavers.

Techniseal®

POLYMERIC SAND FOR PAVER JOINTS

HP NEXTGEL™ POLYMERIC SAND
- False and wide joints
- Heavy-sloped and high-traffic areas
- High-humidity areas and pool decks

SMART SAND
- New Haze-Free technology
- For concrete paver joints from ⅛” to 1”
- Superior strength
- Driveways, patios and walkways

CLEANERS

PROFESSIONAL-GRADE OIL & GREASE REMOVER
- Dislodges deeply set petroleum-based products, motor and hydraulic oil

DIRT & GREASE CLEANER
- Removes motor oil and grease

RUST REMOVER
- Removes stains caused by steel, rusted metal objects and fertilizers

PAINT, TAR AND RUBBER REMOVER
- Dissolves paint, tar or bitumen, rubber and chewing gum

ORGANIC STAIN REMOVER
- Effectively removes moss, mildew, dead leaves, wine, blood and non-greasy food stains

PAVER RESTORER
- Removes cement and mortar jointing haze

PAVER PREP / EFFLORESCENCE CLEANER
- Dislodges efflorescence and ground-in dirt
- Prepares pavers prior to sealant application

ECO-STRIPPER
- Removes most stains, sealants and coatings without affecting the surface

SEALERS

NATURAL LOOK MATTE FINISH PENETRATING (IN)
- Preserves the natural look of pavers
- Ideal for slip-prone surfaces

CLEAR LOOK SATIN FINISH (EV)
- Preserves the original color of pavers
- Ideal for driveways, patios and walkways

COLOR BOOST MATTE FINISH PENETRATING (CB)
- Enhances the color of pavers
- Ideal for slip-prone surfaces

WET LOOK GLOSS FINISH (WLS)
- Enhances the color of pavers
- Ideal for driveways, patios and walkways

SUREFOOT I ANTI-SLIP GRIT FOR WATER-BASED PROTECTORS
- Mixes easily with Protector without changing its appearance
- Highly recommended for pool decks and sloped driveways, steps, low porosity substrates, etc.

NULOOK® TINTED PROTECTOR FOR CONCRETE PAVERS SEMI-GLOSS FINISH
- Colors pavers
- Water based
- Choice of 4 rich colors

PRODUCTS FOR CAST STONE SLABS

WET-CAST PAVER PREP
- Prepares wet-cast pavers prior to sealant application

PROTECTOR FOR WET-CAST PAVERS (WC) NATURAL LOOK MATTE FINISH — PENETRATING
- Preserves the natural look of wet-cast pavers

RG+ CONCRETE ADHESIVE
- Low-VOC formula
- Ultra-adherent on dry, wet or frozen surfaces
- Elastomeric resin-based compound — remains flexible
- Ideal for the construction of retaining walls

Polymeric Sand Haze

Polymeric Haze from the use of polymeric joint sand may appear on your concrete products if the sand was not removed from the surface of the paver properly. This does not, in any way, affect the integrity of the product or your installation. The hazing will weather away naturally with time and rain. It can be removed with a specialized cleaner. It is advised that you contact your contractor or the manufacturer of the polymeric sand used for advice on recommendations.

EP Henry accepts NO responsibility or liability for this occurrence.

STRUCTURE BOND ADHESIVE
- Super-strength hardscape foam adhesive
- Designed for use with Cast Stone Wall and other wall products
- Precise delivery - No mess, no waste
- 8 minute bond time
- Adheres to wet masonry products
- Adjustable bead size
- Performs on all construction materials
- Fireproof and waterproof
- One 24 oz. can is equivalent to five 10.5 oz. tubes

STRUCTURE BOND FOAM ADHESIVE

SEK SUREBOND

PAVER EDGE RESTRAINT

The purpose of Edge Restraint products is to restrain pavers' lateral motion. Without a proper Edge Restraint System, pavers are prone to shifting. EP Henry offers the Snap Edge Paver Restraint System.

ADVANTAGES OF THE SNAP EDGE RESTRAINT SYSTEM:

- One-piece system does it all; straight, curves, or even a complete radius, without waste
- An 8' piece transports easily and requires no extra connectors
- Open base design allows for grass growth along paver edge, creating a strong yet invisible edge
- Patented snap and spike-together ends for a secure connection and extra support
- Rugged injection-molded plastic ensures the strongest edge designed for vehicular and patio/walkway applications

ADHESIVE

EP Henry offers the following adhesive for wall applications:

SUREBOND PAVER BOND

- High strength structural grade adhesive
- Durable formula withstands extreme wear and tear, including heavy vehicular traffic
- Sets quickly in only 10 minutes
- Freeze-thaw stable
- Naturally shims

TENCATE MIRAFI

SEPARATION FABRIC

Mirafi® 500x geotextile fabric is recommended for use with all paver installations. Its primary purpose is to keep the base material from working its way into the soil underneath, thus reducing the possibility of settling.

This product, which costs only pennies per square foot, is an inexpensive insurance policy for your pavement.

GEOGRIDS

EP Henry offers the highest quality geogrids for SRW applications.

MIRAFI® GEOGRID

1XL 20 SQUARE YARD	4' X 45'	ROLL
2XT 33.3 SQUARE YARD	6' X 50'	
3XT 200 SQUARE YARD	12' X 150'	
5XT 200 SQUARE YARD	12' X 150'	
8XT 267 SQUARE YARD	12' X 200'	

UX MESA GRID

UX1100 121 SQUARE YARD	4.36' X 250'	ROLL
UX1400 121 SQUARE YARD	4.36' X 250'	
UX1500 96.9 SQUARE YARD	4.36' X 200'	
UX1600 96.9 SQUARE YARD	4.36' X 200'	
UX1700 96.9 SQUARE YARD	4.36' X 200'	

Please note: Mesa UX Grid must be used on all Mesa SRW applications.

STRATA

SLEEVE-IT® SYSTEM

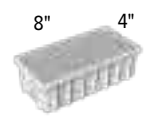
WHEN YOUR WALL NEEDS A FENCE

The Sleeve-It® System is a patented, code-compliant, fence post anchoring system that integrates stable fence footings into the support structure of walls while the retaining wall is being constructed. This unique fence system is pre-engineered and pre-designed so that the usable real estate at the top of a retaining wall is not wasted. Using the system as part of the Segmental Retaining Wall (SRW) eliminates a 3 foot offset requirement for rails and fences that are added after wall construction, reducing specifier liability and associated costs with building-code compliance. Sleeve-It® also offers a below grade engineered design that provides superior safety in a cost-effective solution.

KERR LIGHTING

Create beauty and instill pride of ownership by adding the finishing touch of Kerr Lighting for pavers, retaining & seat walls, pillars & steps and more!

PAVER LIGHTS



BRICK STONE

COVENTRY® STONE I
OLD TOWNE COBBLE
VILLAGE SQUARE

COVENTRY® STONE I
OLD TOWNE COBBLE

LED WALL, STEP & PILLAR LIGHTING

WALLTER™ AND CORNELIUS™ LED WALL, STEP & PILLAR LIGHTING

Wallter and Cornelius Hardscape Lights by Kerr Lighting are designed to blend in with your hardscape design. They provide an unrivaled combination of energy efficiency, durability, and brilliant light quality that you've come to expect from Kerr Lighting. Featuring the latest developments in LED technology, these lights offer an evenly distributed warm-white color, long life for low maintenance costs, and continuous performance under all weather conditions.

The sleek, compact fixtures minimize their impact on your hardscape design. Made from a durable polycarbonate plastic, they will not corrode or weather like other materials. Because the fixtures are seamless, the light beam is controlled with no seepage around the edges. Use Wallter and Cornelius as your solution for a variety of outdoor settings including under wall caps, pillar caps, steps, and outside pillar corners.

SPEC MIX®

Polymer Modified Adhered Veneer Masonry Mortar

SPEC MIX PMAVM is a technologically advanced adhered veneer mortar for use in bonding manufactured stone veneer, natural thin cut stone and thin brick to a cementitious substrate. PMAVM is designed to provide:

- Excellent workability and cohesion
- High bond strength and durability
- Sag and water resistance
- Efflorescence minimization

SPEC MIX PMAVM has been rigorously tested to reduce the probability of unit "pop-offs" and contractor call-backs to repair adhered veneer failures common with standard mortars.

INDUSTRY EXCLUSIVE LIFETIME PRODUCT WARRANTY AND LIMITED INSTALLATION WARRANTY

Because we believe that the best warranty is one that you never use, we build quality into every product. We are so confident in our products that we offer a Lifetime Warranty on the structural integrity* of our paving stones and wall systems for residential use. At no cost to you, EP Henry will replace paving stones and wall system products whose structural integrity is found to be defective under normal use when properly installed according to EP Henry standards and guidelines (labor excluded). We also offer an industry exclusive Limited Installation Warranty on projects installed by an EP Henry Authorized Hardscaping Contractor®, referred through our Project Services team.**

For complete terms and conditions of the warranty, visit ephenry.com.

*A defect in "structural integrity" means the inability of a properly installed and maintained paver or wall product to perform the function for which it was designed due to defects in material. A defect in "structural integrity" does not mean a function caused by improper installation, workmanship or efflorescence.

**Homeowners must register their project through EP Henry Project Services. Proof of purchase required.

Cast Stone Wall and Cast Veneer Stone products are covered under a separate warranty; please visit our website for details.

PRODUCT NOTES

READ PRIOR TO INSTALLING ANY PAVER OR WALL PRODUCT

If you believe there is an issue with product style, color, or quality, do not install it and please contact your distributor immediately. Save all cube tags and provide to the distributor or manufacturer's representative who comes to the job site. INSTALLATION OF PRODUCT IS DEEMED ACCEPTANCE. No claims or returns on installed product will be allowed.

EFFLORESCENCE

Efflorescence is a whitish, powder-like deposit common on concrete and masonry products which will normally disappear over time with natural weathering. According to the Interlocking Concrete Pavement Institute (ICPI), it will typically stop developing within 18-24 months. Although it may present an aesthetic concern, efflorescence will not affect the structural performance of pavers or wall systems. Efflorescence is a natural occurrence for which EP Henry accepts neither responsibility nor liability. For more information, please visit: www.icpi.org, www.ncma.org, www.masonryinstitute.org, or www.bia.org.

POLYMERIC SAND HAZE

Polymeric haze from the use of polymeric joint sand may appear on your pavers if the sand was not removed from the surface of the pavers properly. This does not in any way affect the integrity of your pavers or the installation. The haze will weather away naturally with time. If you wish to remove it with a cleaning product, it is recommended that you contact your distributor or the manufacturer of the polymeric sand used for advice and product recommendations. EP Henry accepts NO responsibility nor liability for this occurrence.

Please see p.138 for more information.

DE-ICING

While no concrete product is truly de-icing salt proof, EP Henry Pavers — due to their high strength and low absorption rates — are more resistant to de-icing salts than poured concrete, asphalt and pavers that utilize inferior materials. However, misuse of de-icing products can, over time, lead to damage. EP Henry recommends the Interlocking Concrete Pavement Institute's guidelines to limit exposure to de-icing materials. For more information visit icpi.org.

COLOR

EP Henry Hardscaping products are made from natural materials and variations in shade can be expected. Additionally, many of our colors are achieved through a random mixture of several colors and the presence of any of these colors will vary from one unit to another. It is recommended that the installer draw from multiple cubes of material during installation to disperse any color range more uniformly. The end user of the material (home or business owner) should make their selection from current physical product samples that show the range of color.

DON'T SCUFF THOSE PAVERS!

EP Henry recommends the use of a vibrating plate compactor with a protective pad to prevent surface damage to the pavers during installation. EP Henry will not be responsible for compaction scuffs or burns on pavers. *PLEASE NOTE,* some pavers and all Cast Stone slabs should not be compacted using a vibrating plate compactor.

Look for this symbol on product pages for restrictions.

Double Sided Cast Stone Wall Aspen

NEXT STEPS

Whether you are looking to add a new front walkway to increase your curb appeal or planning an awe-inspiring outdoor living space, beginning a construction project can be a bit overwhelming at first.

We get it.

It's a big decision and you want it done right. We can help with the groundwork. In this fast-moving world of automation, sometimes you just need to talk to a live person, one-on-one. That's why we have a full-time Project Service team to take your call and answer your questions.

Give us a call.

We'd love to learn about your project. We can help you find experienced EP Henry Authorized Hardscaping Contractors® in your area so you can begin discussing design ideas and getting quotes that fit your space and budget.

We take it a step further.

Because our goal is to provide you with the best product and ensure you get the best finished project, we have experts at every level to support our distributors and contractors with Technical and Product Installation assistance.

We've got you covered.

We are so confident in our products that we offer a FREE Lifetime Warranty on the structural integrity of our paving stones and wall products for residential use. That's saying a lot for a company that began in 1903. Take advantage of our industry-exclusive Limited Installation Warranty on projects installed by an EP Henry Authorized Hardscaping Contractor, referred though our Project Services team.

Get started!

Call us at **800-44-HENRY (800-444-3679)** or visit **ephenry.com/contact** and an EP Henry Project Services team member will help you go from inspiration to installation.

> We had high expectations and standards. EP Henry not only met them but their products, distributors and staff have far exceeded them.

"I was living on the West Coast while in the process of building a home with a prominent homebuilder in Pennsylvania. During the final stages, it came time for me to choose the walkway and the landscaper suggested looking at EP Henry pavers. I emailed them for a catalog and a Project Services team member called me within one day and then offered to follow up once I received the catalog.

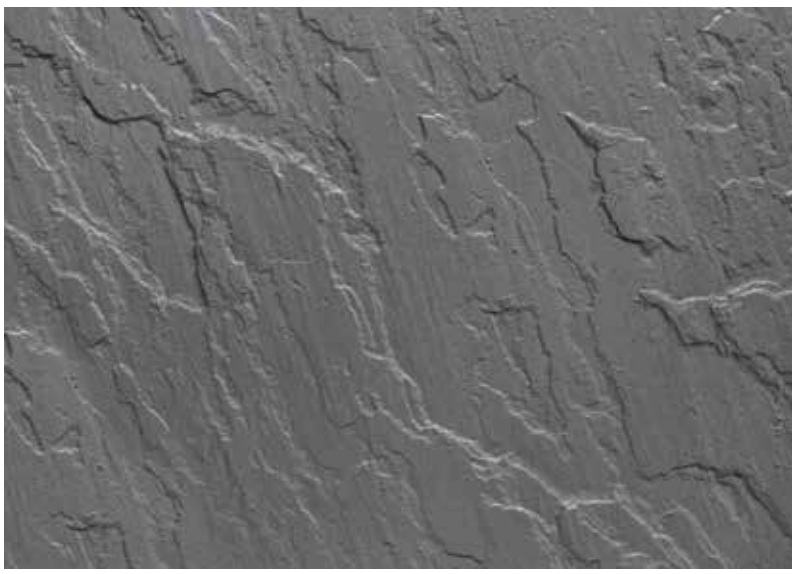
After discussing options with my husband, I called her back with some questions. I must say that I have not received this kind of outstanding customer service in a very long time. I found her patient, kind and extremely helpful. Being born and bred in NYC, I am not prone to gushing, but I am that impressed with the customer service that I have received. Furthermore, my husband and I have decided to choose EP Henry purely based on the care and attention that we have received from their Project Services Team."

Bristol Stone II with ColorTech Sedona, Random Installation; Forma Sand double border

Belmont with ColorTech: The Latest in Cast Stone Paver Technology

We're proud to announce the latest addition to our cast stone family of products. Belmont with ColorTech has been exclusively designed as a companion to the Cast Stone Collection, which includes both our industry-leading Cast Stone Walls and our new Cast Stone Caps. We encourage you to see the difference yourself. Ask your contractor or check out samples at any EP Henry Authorized Hardscaping Distributor®.

For more information turn to page 52



The Imperial Collection: Quality & Value

Rittenhouse, Marquis Wall & More

The Imperial Collection offers a truly exceptional value. Imperial Pavers and Walls are manufactured with the same EP Henry quality standards and lifetime warranty you'll find in all our products, and are available in a range of the most popular colors and profiles in our industry. Pick up a copy of the Imperial Catalog at your local distributor – or visit us online – to explore the full range of striking, cost-effective choices Imperial offers for your next hardscaping project.
